Weight vs. checkability (droppers), x = WCR-based mde_g
A: CS (simple)
untestable wt=0.37 rho(w,pre_g)=-0.80
B: stacked (R2 FE)
untestable wt=0.00 rho(w,pre_g)=0.31
B2: stacked Cengiz +/-4 (NT)
untestable wt=0.00 rho(w,pre_g)=0.22
C: imputation (BJS)
untestable wt=0.37 rho(w,pre_g)=-0.80
not testable
cohort aggregation weight
minimum detectable pre-trend slope mde_g (WILD CLUSTER BOOTSTRAP SE; log; right strip = not testable)
testable
FALSE
TRUE
n_g
Panel B2 (Cengiz +/-4): cohorts with pre_g<4 (2001-2003) are excluded by the window, not down-weighted.
